

Victor Valley Union High School District

Moving the District from Good to Great

Jerry Crawford

Director of Transportation

In August 1981, Jerry Crawford began his career with the Victor Valley Union High School District. Jerry's experience encompasses every aspect of the school transportation industry from driving a bus to routing and scheduling, from driver training and safety to employee supervision and department management. Following nine years as a school bus driver, Jerry was certified by the State of California as a School Bus Driver Instructor in May of 1990. For seventeen years, Jerry instructed and trained every school bus driver to insure that only the safest and most qualified individuals were entrusted with the transportation of our students. In November of 1999, Jerry successfully completed the Department of Education's School Transportation Administrators Course through the California State University, Sacramento. Completion of this program gave Jerry the education and training needed for him to obtain the position that he currently holds, Director of Transportation. He has held this position since March of 2007.

Born and raised in Apple Valley and a graduate of a local high school, a father of three and a grandfather of four, Jerry has dedicated himself to the students of our community and he demonstrates this commitment by his efforts in providing safe, timely and efficient transportation services to the students of our district.
